

PROFILE SUMMARY

AI-focused Software Engineer specializing in NLP, Generative AI, Deep Learning, Machine Learning, along with blockchain and Web3, with hands-on experience in word embeddings, RAG pipelines, Agentic AI, LangChain and full stack. Skilled in basic data preprocessing, feature engineering, and problem solving, with hands-on project experience in speech and audio processing, with a strong foundation in Data Structures and Algorithms and Competitive problem solving using Java.

EDUCATION

- KIET Group of Institutions, Ghaziabad, Uttar Pradesh** 2024 – 2028
B.Tech in Computer Science and Engineering CGPA: 8.57
- Lord Buddha Public School, Kota, Rajasthan** 2023
Class XII (CBSE Board) Percentage: 90%
- St. John's Sr. Sec. School, Gola Gokarannath, Uttar Pradesh** 2021
Class X (CBSE Board) Percentage: 94.4%

TECHNICAL SKILLS

Programming and Querying: Java, Python, JavaScript (ES6+), SQL, Rust, Solidity, Dart
Web & Backend: JavaScript, React, Firebase, MongoDB, Node.js, Express.js, Spring Boot, AuraDB, PostgreSQL, Anchor, Next.js, LangGraph, LangChain, Flutter, Flask, Neo4j
Core Concepts: DSA, OOPs, Problem Solving, DBMS, Operating Systems, Computer Networks
Machine Learning & AI: Agentic AI, Data Preprocessing, Feature Engineering, Image Processing, Supervised Learning
Tools: Git, GitHub, VS Code, Jupyter Notebook, Postman, Power BI, Tableau, Claude, Antigravity, Cursor, Google AI Studio, Figma AI

PERSONAL PROJECTS

- TrueMemory (In Progress)** | *Python, SQLite, Vector Embeddings, Semantic Search, NLP, LLM Memory Pipelines*
- Developed a complete local-first long-term memory engine for AI agents enabling automated context capture and semantic recall.
 - Implemented vector search and SQLite persistence to eliminate cloud latency while dynamically resolving stale facts and contradictions.
 - Designed automatic context injection hooks for CLI agents (Claude CLI, Gemini CLI, Cursor), achieving high-accuracy retrieval across extended sessions.
 - Benchmarked memory recall accuracy against datasets (e.g., LoCoMo, LongMemEval), optimizing vector indexing for real-time local performance.
- Online TrendStore (In Progress)** | *Python, NumPy, Pandas, NLP, Agentic-AI, RAG*
- Developing a trend store in which AI identifies trends and creates an online store for each one.
 - Reads trends online through social media and identifies the trend accordingly.
 - Drop-ships a new store for every new profitable trend identified.
 - Prepared data for visualization as well as positive trend identification; uses Stripe for payment functionality.
 - Improved understanding of speech processing pipelines and feature engineering.
- VeriVolunte** | *React, Node.js, Python, SQLite, Google Gemini, NLP, Image Extraction*
- Developed an AI-powered full-stack platform to automatically connect volunteers with verified community needs and events.
 - Integrated the Google Gemini AI API to analyse uploaded images and text.
 - Implemented interactive geolocation mapping using React to visualize real-time community needs.
 - Built dynamic and responsive user interfaces using Next.js and Framer Motion to ensure a premium user experience.

ACHIEVEMENTS AND COMPETITIVE CODING

- Led a team of developers as Team Lead to a win in our track at Quackathon, a hackathon organized by Product and Devnovate (June 2026).
- Codeforces: Max Rating 677 (Codeforces Round 1108, Div. 2) 29xpaarth
LeetCode: Rated 1400+ (Weekly Contest 512) Paarth_05

CERTIFICATIONS

Cisco Networking Essentials — Cisco Networking Academy (2026)
Advanced Java — LinkedIn Learning (2025)
