

LM Language Metrics

Admin Panel — Platform Control Center

Functional Specification & Feature Blueprint

Prepared as a build reference for the LM development team

Contents

1. Admin Dashboard — Home
 2. Teacher Management
 3. Student Management
 4. Language & Course Management
 5. Payment & Revenue Management
 6. GST & Invoice Management
 7. Teacher Payout Management
 8. Class / Booking Management
 9. Class Recording Management
 10. Complaints / Dispute Management
 11. Platform Security & Monitoring
 12. Communication Management
 13. Reviews & Ratings
 14. Coupons & Offers
 15. Marketing / CMS
 16. Reports & Analytics
 17. Admin User & Permission Management
 18. Settings
 19. Legal & Compliance
 20. Audit Log
- Sidebar Structure & Non-Negotiables
- MVP Build Order

1. Admin Dashboard — Home

The first screen an admin sees. It should surface platform health at a glance:

- Total students
- Total teachers
- Active teachers
- Pending teacher approvals
- Total revenue
- LM commission earned
- Teacher payouts pending
- Active courses
- Classes completed
- Classes scheduled today
- New registrations
- Open complaints / disputes
- Average teacher rating
- Cancelled / refunded bookings

Quick Graphs

- Revenue by day/month
- Student growth
- Teacher growth
- Most popular languages
- Most popular courses

2. Teacher Management

One of the most important sections of the panel.

Teacher List

- Search teacher
- Filter by language
- Filter by experience
- Filter by status
- Filter by verification
- Sort by rating
- Sort by earnings

Teacher Profile — Admin View

- Teacher name & profile information
- Gender
- Education
- Experience
- Languages & language proficiency
- Certificates
- Resume / documents
- Profile photo (if applicable)
- BGV status
- QA status
- Membership status
- Courses offered
- Students taught
- Ratings / reviews
- Earnings
- Number of classes
- Attendance
- Complaints

Admin Actions

- Approve teacher
- Reject teacher
- Suspend teacher
- Reactivate teacher
- Permanently ban teacher
- Edit profile
- Verify documents
- Approve language qualification
- Mark BGV complete
- Mark QA complete
- Reset teacher password

- View teacher activity
- View teacher earnings
- View teacher contracts

3. Student Management

- View all students
- Search student
- View student profile
- See enrolled courses
- See payment history
- See classes
- See attendance
- See teacher selected
- See ratings/reviews
- See complaints
- Suspend student
- Reactivate student
- Block student
- Reset password
- Manually enroll student
- Issue refund where permitted

4. Language & Course Management

This controls what LM actually sells.

Languages

- Add language
- Remove language
- Edit language
- Enable/disable language
- Set language icon/flag
- Set number of levels

Example — French: A1 · A2 · B1 · B2 · C1 · C2

Courses

- Create course
- Edit course
- Delete/deactivate course
- Set price
- Set duration
- Set number of classes
- Set class duration
- Assign teachers
- Change course description
- Add syllabus
- Set level
- Publish/unpublish

5. Payment & Revenue Management

This needs to be extremely detailed since LM takes its 30% commission. Admin should see every transaction, e.g.:

Field	Example
Order ID	LM100245
Student	Rahul
Course	French A1
Course Fee	■15,000
GST	■2,700
Total Paid	■17,700
Teacher Share	■10,500
LM Share	■4,500
Payment Gateway Fee	■XXX
Payment Status	Paid
Teacher Payout	Pending / Paid

Functions

- View all transactions
- Payment status (successful / failed / pending)
- Refunds & partial refunds
- GST information
- Download invoices
- Generate invoices
- Payment gateway reconciliation
- Teacher payout calculation
- Mark payout completed
- Export transactions to Excel/CSV

6. GST & Invoice Management

- Generate GST invoice
- Download invoice PDF
- Send invoice to student
- View invoice history
- Invoice number management
- GSTIN management
- CGST/SGST calculation
- IGST calculation
- Customer GSTIN field
- B2B/B2C classification
- Credit notes
- Refund invoices/adjustments
- GST reports

Important: Have your developer build the GST logic so the tax calculation is configurable rather than hard-coded.

7. Teacher Payout Management

Keep this separate from general payments.

Admin sees: Teacher → Course → Student → Total fee → Teacher share → Status

Functions

- Pending payouts
- Approved payouts
- Paid payouts
- Failed payouts
- Bank details
- Payout date
- Payout reference/UTR
- Download payout statement
- Export payout report

Do not allow admin to manually alter the 70/30 split without a special permission.

8. Class / Booking Management

Visibility

- Upcoming classes
- Ongoing classes
- Completed classes
- Cancelled classes
- Rescheduled classes
- Missed classes
- Teacher absent
- Student absent

Actions

- View class
- Reschedule
- Cancel
- Assign another teacher
- See meeting link
- See class duration
- See attendance
- See recording status
- See class notes

9. Class Recording Management

LM's model relies heavily on platform-only communication, so this matters.

Visible Fields

- Recording available/not available
- Recording duration
- Class ID
- Teacher
- Student
- Date/time
- Recording storage location

Actions

- View recording
- Download recording where legally/operationally appropriate
- Report recording problem
- Delete recording according to retention policy

Add automatic recording-retention rules rather than keeping every recording forever.

10. Complaints / Dispute Management

A proper ticket system. Example: a student complains — *"Teacher asked for my WhatsApp number."* → Admin receives **Complaint #LM1024**.

Admin Can

- View complaint, student, teacher, relevant class, relevant recording
- View previous complaints
- Add internal notes
- Contact student / teacher
- Resolve complaint
- Escalate complaint
- Suspend teacher
- Refund student if applicable

Status Flow

New → Investigating → Action Required → Resolved → Closed

11. Platform Security & Monitoring

- Login history
- Device information
- IP logs
- Failed login attempts
- Account suspension / blocking
- Session management
- Password reset
- Suspicious activity alerts

Contact Protection

If the system can detect phone numbers, emails, or social handles being shared in chats, flag them automatically — e.g. *"Teacher attempted to share WhatsApp number."* Admin can then investigate.

12. Communication Management

Admin should be able to send notifications to both students and teachers via:

- Push notifications
- Email
- SMS
- In-app announcements

Examples: "Your class starts in 30 minutes." · "Your teacher has been assigned." · "Your payout has been processed."

13. Reviews & Ratings

- View reviews and ratings
- Hide inappropriate reviews
- Flag review
- Remove review where policy allows
- Respond to complaints about reviews

Don't give admins the ability to silently change ratings.

14. Coupons & Offers

Useful later in LM's growth. Admin can:

- Create coupon
- Percentage discount
- Fixed discount
- First-student discount
- Language-specific coupon
- Course-specific coupon
- Expiry date
- Maximum usage
- Minimum order value
- Disable coupon

Example: WELCOME10 → 10% OFF

15. Marketing / CMS

So content changes don't require a developer every time.

- Homepage banners
- Promotions
- FAQs
- About LM
- Testimonials
- Blog/articles
- Announcements
- Featured teachers
- Featured languages
- Course descriptions
- Homepage sections

16. Reports & Analytics

Revenue

- Daily
- Weekly
- Monthly
- Yearly

Teachers

- Top teachers
- Most active
- Highest-rated
- Highest earning

Students

- New students
- Active students
- Returning students
- Drop-offs

Languages

- Most popular language
- Most popular level
- Revenue by language

Operations

- Classes completed
- Cancellation rate
- Teacher attendance
- Student attendance

- Complaint rate

17. Admin User & Permission Management

Very important: don't give every admin full access.

Role	Access
Super Admin	Everything
Finance Admin	Payments, GST, invoices, payouts, reports
Teacher Admin	Teacher approvals, BGV, QA, teacher profiles
Support Admin	Students, complaints, classes, tickets
Content Admin	Courses, languages, website content, promotions

Permissions should be controllable individually, not just by preset role.

18. Settings

- LM company information
- GSTIN
- Invoice prefix
- Commission percentage
- Teacher membership fee
- Demo fee
- Refund policy
- Cancellation policy
- Class duration
- Platform fees
- Payment gateway
- Email settings
- SMS/OTP provider
- Notification settings
- Recording settings
- Terms & conditions
- Privacy policy

19. Legal & Compliance

- Teacher agreements
- Student terms
- Privacy policy
- Refund policy
- Teacher code of conduct
- Platform rules
- BGV records
- Consent records
- Recording consent
- Invoice records
- GST records

20. Audit Log — Must Have

Every important admin action should be recorded. Examples:

Timestamp	Admin	Action
20 Aug 2026, 17:52	Riyansh	Changed course price — Old: ₹14,999 → New: ₹15,000
—	—	Admin suspended Teacher LM1045
—	—	Admin refunded ₹5,000 to Student LM2044

This protects both the LM team and the platform from internal mistakes or unauthorized changes.

Audit Logs

Non-Negotiables for LM

- 1. Teacher verification + BGV
- 2. Payment + 70/30 commission tracking
- 3. GST + invoice system
- 4. Class/recording monitoring

- **5. Complaint & violation system**
- **6. Admin role permissions**
- **7. Complete audit logs**

MVP Build Order

Don't ask the developer to build everything at once. Build the MVP admin panel first, then layer on marketing and analytics features.

Phase 1 — MVP Core

Teachers → Students → Courses → Classes → Payments → Payouts → Complaints → Settings

Phase 2 — Expansion

GST & Invoicing, Recordings, Security & Monitoring, Admin Roles & Permissions, Audit Logs

Phase 3 — Growth

Marketing/CMS, Coupons & Offers, Reports & Analytics, Communication Management
